

# ENERGY MANAGEMENT SYSTEM

**WORKSHOP**

**Torino May 24-25-th 2007**

Chair-man: Michele Tartaglia  
Politecnico di Torino

# Michele Tartaglia

Associate professor of Electrotechnics.

Responsible of POLYCITY project for Politecnico di Torino (POLITO).

Member of CIGRE task force on magnetic field mitigation.

Member of CEI Italian Electrical Commission on Human exposure to electromagnetic fields.

Author of more than 100 papers on electromagnetic field computation, power system and energy applications.

# Welcome and introduction/1

This workshop is a dissemination activity of POLYCITY project.

The project integrates different aspects of urban conversion:

1. Development of a new large urban area near Barcelona, Cerdanyola.
2. Restoring of an old city quarter in Torino, Arquata.
3. New building construction on a former military ground near Stuttgart, Ostfildern.

# Welcome and introduction/2

POLYCITY project belongs to a major initiative of European research and technological development called

## **CONCERTO**

The initiative supports local communities in demonstrating actions

sustainable and energy efficient

# Welcome and introduction/3

The workshop intends to improve interactions among  
**CONCERTO** initiatives and  
Energy operators like

- Research centres (private or public)
- Energy managers
- Energy service companies (ESCO)

# Welcome and introduction/4

The organization of this workshop has been possible thank you to:

INTESA SANPAOLO for the financial support to the meeting organization,

ATC for the hospitality given to the meeting,

Dipartimento Ingegneria Elettrica (POLITO) for strong efforts of secretariat and scientific organization,

All the speakers who will give results on their research and practical activities,

All the participants for dissemination of presented studies and applications.
