

# VISIONS OF SUSTAINABLE URBAN ENERGY SYSTEMS

**CITYNET Workshop and POLYCITY Excursion  
Stuttgart, Germany, 15. September 2010**

**POLYCITY Final Conference  
Kulturbetrieb Wagenhallen  
Stuttgart, Germany  
16. – 17. September 2010**

**ANNOUNCEMENT**  
Put this date in  
your diary!

## **The POLYCITY Project**

*Visions of Sustainable Urban Energy Systems* is the topic of POLYCITY's International Final Conference. Highly efficient urban quarters with renewable energy supply projects from all over the world will be presented at the final conference.

POLYCITY is a project of the CONCERTO initiative, co-funded by the European Commission. In the course of the POLYCITY project, three sustainable urban areas in Germany, Spain and Italy are being developed, focusing on energy efficient buildings, the use of renewable energies and large scale energy management systems.

A highlight of the first conference day is our evening guest speaker Dr. Franz Alt, author, journalist and TV editor. He speaks about cities of the future followed by a big POLYCITY conference party with live music and buffet.

## **CITYNET**

CITYNET is an european graduate school on urban energy management funded by the European Marie Curie Programme. Eight universities from Germany, Spain, Italy, the United Kingdom, Poland, Ireland and Turkey cooperate on the development of internet based urban energy management systems.

The **CITYNET workshop** will demonstrate the internet based design and operation tools for energy efficient urban management. You can learn how to use integrated building design tools with renewable supply simulations and real time data access for optimisation.

The **POLYCITY excursion** showcases the project area *Scharnhäuser Park*. Visit the ORC biomass power plant, energy efficient public and residential buildings and an office building with a district heating powered absorption chiller.
